PROFESSIONAL SUMMARY

Product and AI engineer with 5+ years of progression at Gradly, from Founding Engineer to Chief of Staff. Shipped core products, operating systems, partner integrations, and AI support for a platform serving 10K+ members across 25+ U.S. universities. Combines hands-on engineering with product, operations, sales, and team leadership; across four sales cycles, helped grow annual premium volume from $1.2M to $2.5M and net revenue margin from about 12% to 35%.

WORK EXPERIENCE

GRADLY INCORPORATED | REMOTE, U.S.

Chief of Staff | May 2025 – Present

- Led strategy, partnerships, legal and administrative work as the CEO's direct proxy while retaining product and engineering direction; managed a 10-person team across product, engineering, operations, support, marketing, and growth.
- Led four sales cycles that grew annual premium volume from $1.2M to $2.5M and net revenue margin from about 12% to 35%; signed 4 international student-association partnerships and expanded into 15–20 more universities.
- Designed & launched a customer referral program, which increased conversion without increasing acquisition spend; conducted 30+ engineering/product interviews and hired eight people.

Technical Lead | February 2023 – May 2025

- Grew engineering from a solo function to a 6-person team while leading architecture, hiring, and delivery.
- Built Gradly's internal operations platforms for insurance discovery, enrollment, member services, sales analytics, policy administration, and payments; led the React-to-Next.js migration & built the customer-facing product suite and implemented new design system. Immigration · Insurance · Member Dashboard.
- Shipped a production AI Insurance Concierge with human-reviewed reply drafts across email, WhatsApp, SMS, and live chat; separately built auto-tagging for support routing and SLA tracking.
- Built a claims platform spanning intake APIs, AI-assisted document extraction, eligibility and repricing workflows, ACH payments, and member updates; cut processing from about two weeks to seconds and reduced manual operations to one operator. Built a React Native member app and integrated five insurance partners, including building EDI infrastructure for two.

Founding Engineer | July 2021 – February 2023

- Sole engineer, built the company's core backend, early insurance integrations, and operations automation; built an early AI question-answering prototype for insurance plan brochures that was later productionized.

SELECTED PROJECTS

AI Insurance Concierge: Production RAG-based support system using email, WhatsApp, SMS, and live-chat integrations. Drafted replies for human review across all channels and specialized routing agents to auto-tag and resolve support conversations at scale.
Tech stack: RAG, OpenAI, Pinecone, Front API, Firestore, WhatsApp/Email/SMS integrations
Demo.

VisaFile: MVP automation tool for the DS-160 U.S. visa application: a guided intake form feeds a background worker that fills out the official CEAC form automatically, pausing only for CAPTCHA solving or live field corrections via WebSocket before delivering the official confirmation PDF, turning a ~2-hour manual process into a ~3-minute automated run.
Tech stack: Next.js, BullMQ/Redis, Puppeteer, WebSocket, PostgreSQL, S3.
Demo · GitHub.

AI Claims Adjudication: AI-powered claims adjudication platform that automated eligibility checks, medical bill review, and ACH reimbursements, cutting claim processing from ~2 weeks to seconds and reducing manual operations to a single operator.
Tech stack: Next.js, Typescript, OpenAI, RAG, ACH/Payments API
Demo.

SKILLS

Product: 0→1 product strategy, Product Development, Rapid Prototyping, MVP Development, System Design, API Design, Product Analytics
AI/ML: LLM, RAG, AI Agents, Vector Embeddings, Vector Search, AI Evals, Machine Learning, Deep Learning, LangChain, LLamaIndex.
Engineering: TypeScript, JavaScript, React, Next.js, Node.js, Python, React Native, Firebase, GCP, Tailwind CSS, Shadcn/UI, Framer Motion

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore: MCA (October 2021–July 2023; 9.4 CGPA, Gold Medal) · BCA (2018–2021; 8.38 CGPA).

AWARD

$10,000 Performance Bonus, Gradly Incorporated, Fall 2024, for leadership impact on sales and growth outcomes.

CERTIFICATIONS

Next.js and React (April 2023) · Linux Mastery (October 2022) · Node.js API Masterclass (November 2020) · AI, ML, Data Science and Deep Learning (July 2020)
